

We are excited to announce that we have incorporated into our practice new, highly sophisticated, computerized instruments that allows us to provide a more thorough medical analysis of your eyes. Our new **Humphrey FDT Visual Field Instrument** electronically measures retinal function and sensitivity to light. This instrument can assist us in the early detection of many disorders, including brain tumors, glaucoma, diabetic retinopathy, retinal detachments, optic nerve disease, and retinal disturbances due to vascular problems or medications. **We strongly recommend that all of our patients receive these top quality services. They are especially important for people who have:**

- 1) Headaches/Migraines
- 2) See spots or flashes of light
- 3) Have Diabetes or a family history of Diabetes
- 4) Have high blood pressure or a family history of high blood pressure
- 5) Have Glaucoma or a family history of Glaucoma
- 6) Have Retinal problems or a family history of Retinal problems
- 7) A strong eyeglasses prescription
- 8) Over age 35

This state of the art procedure take an additional 2 minutes of your time and there is an additional charge of \$8.00 for this service. Our office charges less than most doctors nationwide who have this service available to offer to their patients.

Please check the appropriate line below and sign at the bottom.

I DO want the FDT screening exam. I agree to pay the additional charge if my insurance will not cover these services.

I DO NOT want the FDT screening exam.

PATIENT'S SIGNATURE: _____ DATE: ____/____/____

Please Note: Many insurance companies still consider these procedures "optional" for some patients, as it represents preventive health care. For some patients, the FDT visual field exam is "required" because of certain eye conditions that may be present or need to be "ruled out." In this latter case, you may be able to submit your bill to your major medical insurance company for possible reimbursement.
